

Available Leverage	1:100	1:100	1:100	1:100	1:100	1:100
Registration fee	\$29	\$96	\$255	\$399	\$997	\$1497

Our Evaluation Criteria

1. 10% Profit Target

To pass our one-phase evaluation, you only need to achieve a profit target of 10% without violating any of our rules. Whenever you pass the evaluation and get access to a live funded account, there is no more target.

2. Daily Drawdown

- Mini - 6%, Bronze - 6% and Silver - 6%
- Gold - 3%, Diamond - 3% and Silver - 3%

For Mini, Bronze and Silver accounts:

- If equity on a \$10,000 account is 10500 at rollover time today (server time 00:00), drawdown must not exceed 6% before the next rollover time (server time 00:00). This means equity must not go below \$9870 before the next rollover time (server time 00:00).

For Gold, Diamond and Master accounts:

- If equity on a \$90,000 account is \$95000 at rollover time today (server time 00:00), drawdown must not exceed 3% before the next rollover time (server time 00:00). This means equity must not go below \$92,150 before the next rollover time (server time 00:00).

Scenario:

You started trading with a \$10,000 evaluation account and made a closed or floating profit of \$900. Now your equity at rollover time 00:00 server time is \$10,900. You continued trading and had a floating loss of \$654 (6% daily drawdown). This is a hard violation of the daily drawdown rule, trader has failed the challenge, account is disabled and permanently lost.

Result: You fail the challenge, account is disabled and permanently lost

Note that once daily drawdown is triggered, it activates close all positions and equity/balance may increase or decrease before all the trades close out especially if the trader traded with large lot size.

3. Overall Drawdown

- Mini - 9%, Bronze - 8% and Silver - 7%
- Gold - 5%, Diamond - 5% and Silver - 5%
- The overall drawdown is calculated based on the initial balance of the account.

Example: If you have a \$3,000 Mini account, your equity must not go lower than \$2,730 (9% drawdown from the initial \$3,000 balance)

Example: If you have a \$90,000 Gold account, your equity must not fall below \$85,500 (5% drawdown from the initial \$90,000 balance)

If equity goes below the maximum drawdown threshold this is a hard violation of the overall drawdown rule, all trades are closed, account is disabled and is permanently lost.

4. Profit Split

Profit Split is 70/30 on the live funded account

5. Payout

Bi-Weekly Payout: The standard payout for live accounts on the Funded Trader Program is set at a ratio of 70/30. This means that traders will receive 70% of the profits made within 15 calendar days if no rule is violated.

If a trader successfully achieves any % increase in their live trading account within 15 calendar days with a minimum of 5 active trading days, they will be eligible for a payout if no rule is violated.

Accelerated Payout: Once you are on your live funded account, there is an exciting opportunity to receive immediate compensation.

If a trader achieves a 10% increase in their trading account after 5 active minimum trading days. They will be eligible for an early payout, regardless of the monthly time frame if no rule is violated.

6. Scaling Plan

Once you are on your live funded account, you have the option to withdraw profit or request to scale up your trading account to the next account size on our plan each time you make 10% profit.

You cannot withdraw and scale! Once a funded trader withdraws profit on an

account such an account is no longer eligible for scaling. Maximum you can get scaled up to is \$500,000!

However, please note that the \$3,000 account is not **eligible** for scaling, but can only scale up with a \$10,000 account

For example, you grow our \$10,000 account to \$11,000, and you request for scaling, we will scale you directly into the \$30,000 live funded account.

7. Consistency Rule

The consistency rule is designed to ensure that traders on The Funded Trader program achieve steady and sustainable profits while effectively managing risk. being disciplined and following a trading plan.

Consistency rule has nothing to do with daily profits or profits per position but with lot size traded. The starting lot size which is the lot size of the first trade position on the evaluation account is the reference lot size.

It's important to avoid violating the consistency rules! If a funded trader makes profits as a result of inconsistent trades the funded trader forfeits all profits made on the account and gets another chance to start from the initial evaluation capital.

Trading inconsistent lot size on an evaluation account that is in overall loss as an excuse to request another chance is not acceptable

Using the starting lot as reference, traders can reduce lot size on subsequent trades by 50%(0.5x) of the starting lot size.

Using the starting lot as reference, trader can increase lot size on subsequent trades by 400%(4x) of the starting lot size

Indices lot size must be consistent with forex currencies lot size traded. 1 lot forex/gold is consistent with 2 lot dj30, 5 lot USTEC, 20 lots US500 12 lots UK100 and 5 lots DE40.

Examples of Consistency Rule Applied to Evaluation account

1. Consider a \$10,000 evaluation account with a profit target of \$1,000 (10%) for evaluation. You have successfully hit your 10% profit target of \$1000.

The profit was made within 5 minimum trading days using the following positions

0.5

0.25

0.5

1.0

2.0

This trading pattern is consistent and adheres to the consistency rule

Result: Evaluation passed if no other rule is violated

2. Consider a \$10,000 evaluation account with a profit target of \$1,000 (10%) for evaluation. You have successfully hit your 10% profit target of \$1000 but the profit was made in 1 trading day using one position of 2.0 lot size.

You continue to trade with 0.01 to 0.99 lot size deliberately to cover the 5 minimum trading days!

The profit was made using the following positions

2.0

0.01

0.01

0.05

0.10

This trading pattern is inconsistent and violates the consistency rule

Result: All profit on the account will be forfeited and the funded trader gets another chance to start from the initial evaluation capital.

3. Consider a \$10,000 evaluation account with a profit target of \$1,000 (10%) for evaluation. You started trading with 0.01 lot size and adhered to the consistency rule on subsequent positions.

All of a sudden you increased the lot size to 2.0 and hit your 10% profit target of \$1000.

The profit was made using the following positions

0.01

0.01

0.01

2.0

0.01

This trading pattern is inconsistent and violates the consistency rule

Result: All profit on the account will be forfeited and the funded trader gets another chance to start from the initial evaluation capital.

8. Expert Advisors and Latency Arbitrage

All Robots including high frequency trading bots are not allowed on our Evaluation program.

High frequency trading bots are bots that do not hold trade for up to a minute.

Latency Arbitrage is a high frequency trading strategy used to front-run trading orders. We do not accept latency arbitrage and we reserve our rights to cancel any trade under latency arbitrage.

9. Third party Copiers

Use of third-party copiers is not allowed on evaluation and live funded accounts. You are allowed to use the TenTrade Social Copy Trading Platform to copy trades on your live account.

If you decide to use TenTrade Social Copy Trading Platform as a Master to trade multiple accounts or for your community, performance fees on the copier must be set to zero (0).

If profit share is not set to zero and Master trader receives performance fees, the performance fees received will be deducted before 70/30 profit share is done. Such performance fees deduction is non refundable as it violates the terms and conditions

10. Refer and Earn

Get 10% in commissions by referring friends who register and purchase a funded account through your unique link. Sign up, share your link, and earn rewards for each successful referral.

11. The only ways you fail the Evaluation?

1. If you violate the overall drawdown of starting balance
2. If you violate the daily drawdown from starting equity at rollover (00:00) server time
3. Hedging: We do not allow hedging
4. Violating ea and copy trading rules
5. Inactivity of 30 days. That is, if you do not place a trade within a 30 day period from the first trade.
6. Latency Arbitrage.
7. Using prohibited trading strategies

12. Prohibited trading strategies

- High-frequency trading
- Ultra-fast scalping
- Latency arbitrage trading
- Any tick scalping strategies
- Any reverse arbitrage trading
- Any hedge arbitrage trading
- Hedging between different accounts

If our risk team traces prohibited strategies, accounts involved will be lost with no refund of initial fee.

The aim of the TenTrade funded trader programme is to discover and support consistently profitable traders.

Trading with high margins is considered a gambling strategy and is against the program's aims and objectives!

Our risk desk team analyses funded trading styles and strategies to ensure compatibility with TenTrade's funded trader program beliefs of trading as well as the aims and objectives of TenTrade funded trader programme.

13. Cancellation of Trades, Account Reset, and Payout Denial

TenTrade reserves the right to cancel trades, reset accounts, and deny payouts where it is confirmed or suspected that a funded trader is hedging using multiple accounts. This includes accounts owned by the funded trader or any other funded trader participating in the program.

Hedging refers to the practice of offsetting positions in one account by taking opposite positions in another account, thereby mitigating risk exposure. By accepting these terms and conditions, the funded trader acknowledges and agrees to comply with this policy.

TenTrade retains the sole discretion to determine instances of hedging and take

Monthly Fees	None	None	None	None	None	None	None
Available Leverage	1:100	1:100	1:100	1:100	1:100	1:100	1:100
Profit Split	70/30						
Registration fee	\$39	\$100	\$300	\$900	\$2700	\$5000	\$10000

For Mini, Bronze and Silver accounts:

- If equity on a \$10,000 account is 10500 at rollover time today (server time 00:00), drawdown must not exceed 6% before the next rollover time (server time 00:00). This means equity must not go below \$9870 before the next rollover time (server time 00:00).

For Gold, Diamond and Master accounts:

- If equity on a \$90,000 account is \$95000 at rollover time today (server time 00:00), drawdown must not exceed 3% before the next rollover time (server time 00:00). This means equity must not go below \$92,150 before the next rollover time (server time 00:00).

Scenario:

You started trading with a \$10,000 evaluation account and made a closed or floating profit of \$900. Now your equity at rollover time 00:00 server time is \$10,900. You continued trading and had a floating loss of \$654 (6% daily drawdown).

This is a hard violation of the daily drawdown rule and the trader is ineligible for a payout while the account is disabled and permanently lost.

Note that once daily drawdown is triggered, it activates close all positions and equity/balance may increase or decrease before all the trades close out especially if the trader traded with large lot size.

3. Overall Drawdown

- Mini - 9%, Bronze - 8% and Silver - 7%
- Gold - 5%, Diamond - 5% and Silver - 5%

The overall drawdown is calculated based on the initial balance of the account.

Example: If you have a \$3,000 Mini account, your equity must not go lower than \$2,730 (9% drawdown from the initial \$3,000 balance).

Example: If you have a \$90,000 Gold account, your equity must not fall below \$85,500 (5% drawdown from the initial \$90,000 balance)

If equity goes below the maximum drawdown threshold this is a hard violation of the overall drawdown rule, all trades are closed, account is disabled and is permanently lost.

Note that once overall drawdown is triggered, it activates close all positions and equity/balance may increase or decrease before all the trades close out especially if the trader traded with large lot size.

4. Profit Split

Profit Split is 70/30 on the live funded account

5. Payout

Bi-Weekly Payout: The standard payout for live accounts on the Funded Trader Program is set at a ratio of 70/30. This means that traders will receive 70% of the profits made within 15 calendar days if no rule is violated.

If a trader successfully achieves any % increase in their live trading account within 15 calendar days with a minimum of 5 active trading days, they will be eligible for a payout if no rule is violated.

Accelerated Payout: Once you are on your live funded account, there is an exciting opportunity to receive immediate compensation.

If a trader achieves a 10% increase in their trading account after 5 active minimum trading days. They will be eligible for an early payout, regardless of the monthly time frame if no rule is violated.

6. Scaling Plan

Once you are on your live funded account, you have the option to withdraw profit or request to scale up your trading account to the next account size on our plan each time you make 10% profit.

You cannot withdraw and scale! Once a funded trader withdraws profit on an account such an account is no longer eligible for scaling. Maximum you can get scaled up to is \$500,000!

However, please note that the \$3,000 account is not **eligible** for scaling, but can only scale up with a \$10,000 account

For example, you grow our \$10,000 account to \$11,000, and you request for

scaling, we will scale you directly into the \$30,000 live funded account.

7. Consistency Rule

The consistency rule is designed to ensure that traders on The Funded Trader program achieve steady and sustainable profits while effectively managing risk. being disciplined and following a trading plan.

Consistency rule has nothing to do with daily profits or profits per position but with lot size traded. The starting lot size which is the lot size of the first trade position on the live account is the reference lot size.

It's important to avoid violating the consistency rules! If a funded trader makes profits as a result of inconsistent trades the funded trader forfeits all profits made on the account and gets another chance to start from the initial funded capital.

Trading inconsistent lot size on a funded account that is in overall loss as an excuse to request another chance is not acceptable

Using the starting lot as reference, traders can reduce lot size on subsequent trades by 50%(0.5x) of the starting lot size.

Using the starting lot as reference, trader can increase lot size on subsequent trades by 400%(4x) of the starting lot size

Indices lot size must be consistent with forex currencies lot size traded. 1 lot forex/gold is consistent with 2 lot dj30, 5 lot USTEC, 20 lots US500 12 lots UK100 and 5 lots DE40.

Examples of Consistency Rule Applied to live accounts

1. Consider a \$10,000 live account and you successfully hit a 10% profit target of \$1000 to qualify for accelerated payout.

The profit was made within 5 minimum trading days using the following positions

0.5

0.25

0.5

1.0

2.0

This trading pattern is consistent and adheres to the consistency rule

Result: You are eligible for accelerated payout if no rule is violated

2. Consider a \$10,000 live account where you started trading with consistent lot size and adhered to the consistency rule on subsequent positions. You made a profit of \$500 within 15 calendar days with a minimum of 5 active trading days.

The profit was made using the following positions

0.5

0.25

0.5

1.0

2.0

This trading pattern is consistent and adheres to the consistency rule

Result: You are eligible for regular payout if no rule is violated

3. Consider a \$10,000 live account and you successfully hit a 10% profit target of \$1000 to qualify for accelerated payout, but the profit was made in 1 trading day using one position of 2.0 lot size.

You continue to trade with 0.01 to 0.99 lot size deliberately to cover the 5 minimum trading days!

The profit was made using the following positions

2.0

0.01

0.01

0.05

0.10

This trading pattern is inconsistent and violates the consistency rule

Result: You are not eligible for accelerated pay out, all profit on the account will

be forfeited and the funded trader gets another chance to start from the initial funded capital.

4. Consider a \$10,000 live account where you started trading with 0.01 lot size and adhered to the consistency rule on subsequent positions.

All of a sudden you increased the lot size to 2.0 and hit your 10% profit target of \$1000.

The profit was made using the following positions

0.01

0.01

0.01

2.0

0.01

This trading pattern is inconsistent and violates the consistency rule

Result: You are not eligible for pay out and all profit on the account will be forfeited and the funded trader gets another chance to start from the initial funded capital.

5. Consider a \$10,000 live account where you made a profit of \$500 within 15 calendar days with a minimum of 5 active trading days.

The profit was made using the following positions

2.0

0.01

0.01

0.01

0.01

This trading pattern is inconsistent and violates the consistency rule

Result: You are not eligible for pay out and all profit on the account will be forfeited and the funded trader gets another chance to start from the initial funded capital.

8. Expert Advisors and Latency Arbitrage

Robots and high frequency trading bots are not allowed on our Evaluation program.

Robots are allowed on live funded accounts but high frequency trading bots are not allowed on live funded accounts

High frequency trading bots are bots that don't hold trade for up to a minute.

Latency Arbitrage is a high frequency trading strategy used to front-run trading orders. We do not accept latency arbitrage and we reserve our rights to cancel any trade under latency arbitrage.

9. Third party Copiers

Use of third party copiers is not allowed on live funded accounts however copy trading on live accounts is allowed using TenTrade Social Copy Trading Platform.

If you decide to use TenTrade Social Copy Trading Platform as a Master to trade multiple accounts or for your community, performance fees on the copier must be set to zero (0).

If profit share is not set to zero and Master trader receives performance fees, the performance fees received will be deducted before 70/30 profit share is done. Such performance fees deduction is non refundable as it violates the terms and conditions

10. Refer and Earn

Get 10% in commissions by referring friends who register and purchase a funded account through your unique link.

11. The only ways you lose a live account?

8. If you violate the overall drawdown of starting balance
9. If you violate the daily drawdown from starting equity at rollover (00:00) server time
10. Hedging: We do not allow hedging
11. Violating ea and copy trading rules
12. Inactivity of 30 days. That is, if you do not place a trade within a 30 day period from the first trade.
13. Latency Arbitrage.
14. Using prohibited trading strategies

12. Prohibited trading strategies

- High-frequency trading
- Ultra-fast scalping
- Latency arbitrage trading
- Any tick scalping strategies
- Any reverse arbitrage trading
- Any hedge arbitrage trading
- Hedging between different accounts

If our risk team traces prohibited strategies, accounts involved will be lost with no refund of initial fee.

The aim of the TenTrade funded trader programme is to discover and support consistently profitable traders.

Trading with high margins is considered a gambling strategy and is against the program's aims and objectives!

Our risk desk team analyses funded trading styles and strategies to ensure compatibility with TenTrade's funded trader program beliefs of trading as well as the aims and objectives of TenTrade funded trader programme.

13. Cancellation of Trades, Account Reset, and Payout Denial

TenTrade reserves the right to cancel trades, reset accounts, and deny payouts where it is confirmed or suspected that a funded trader is hedging using multiple accounts. This includes accounts owned by the funded trader or any other funded trader participating in the program.

Hedging refers to the practice of offsetting positions in one account by taking opposite positions in another account, thereby mitigating risk exposure. By accepting these terms and conditions, the funded trader acknowledges and agrees to comply with this policy.

TenTrade retains the sole discretion to determine instances of hedging and take appropriate actions, including but not limited to the termination of trading privileges and the forfeiture of payouts.

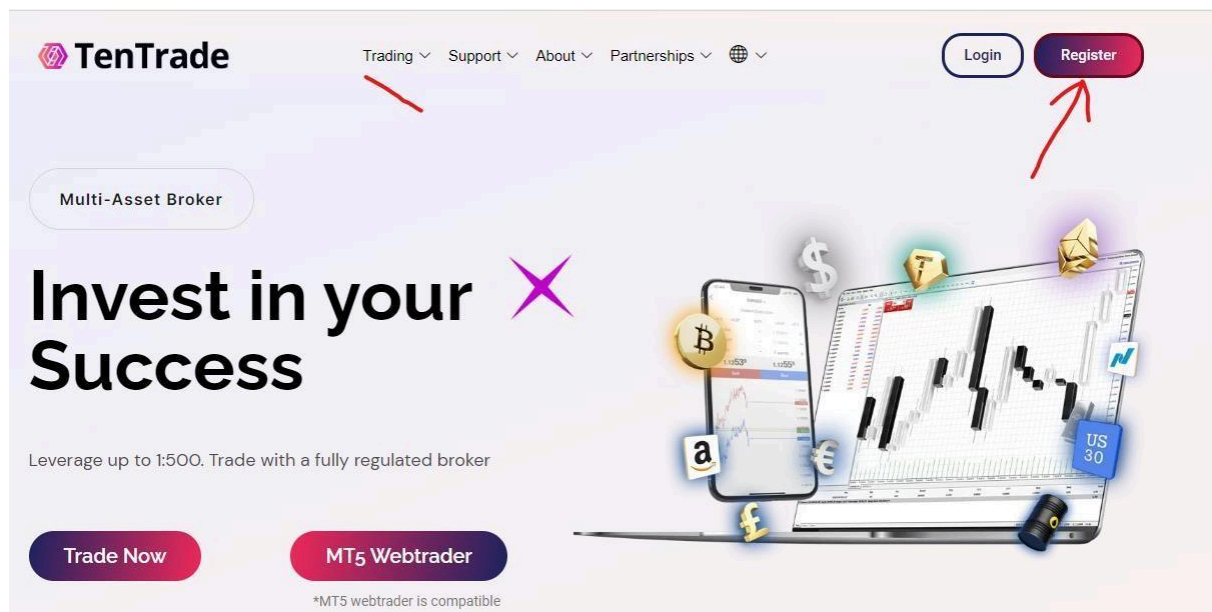

Rest assured Tentrade will never deny pay-outs for funded traders who have made profit legally according to the rules without cheating.

immediately be taken to the tentrade client portal. Also, you will receive an email from TenTrade containing your login details for next time you'd want to login to the client portal. Please check your inbox or spam folder

STEP 2 : MAKE A DEPOSIT

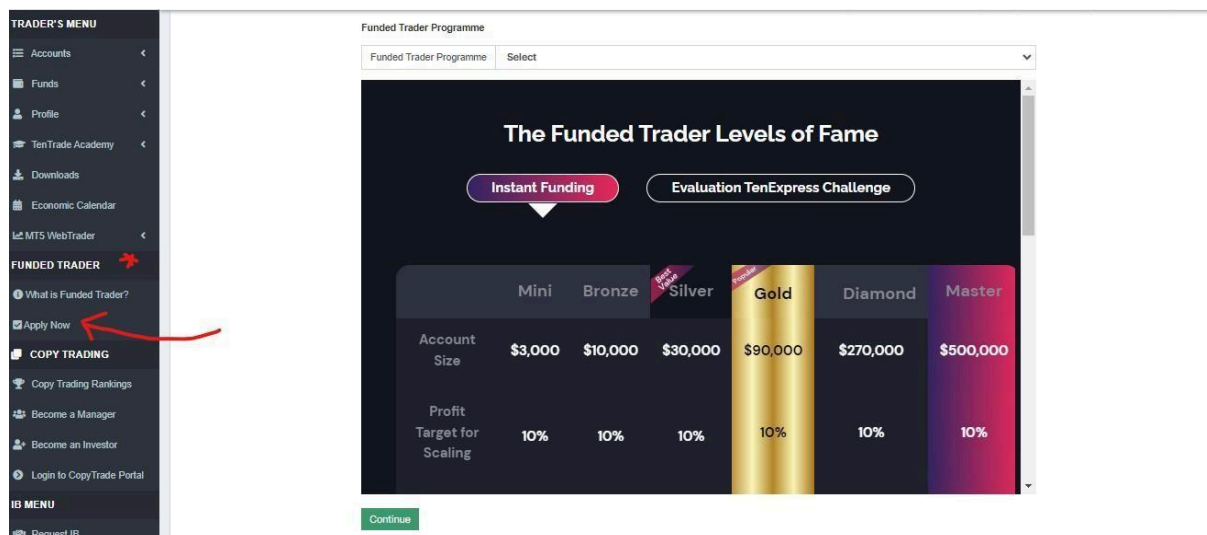

On the left side of your client portal, Select “Funds” then click on **Deposit Funds**

to make a deposit of the amount of funding package that interests you. There are different deposit methods such as cryptocurrency, bank transfer, perfect money, neteller, skill etc

STEP 3 : CHOOSE A PACKAGE

Once you've made your deposit, on the left side of your client portal, under the **Funded Trader**, click on **Apply Now**. Select the trading model you prefer then the package you want, after that click on **Continue** button at the bottom to subscribe

Once you have made the subscription, your request will show as pending and within a few minutes, your trading account details for the trading model will be sent to you via email
