

TEN TRADE FUNDED TRADER PROGRAM (TTFT)

Our Funded Trader Program is the perfect way for you to benefit from trading with OUR money and enjoy the fruits of your success. All you have to do is put your trading skills, market knowledge, and bright strategies to work and profit from your successful trades with an account funded by us.

We are on a search for profitable traders. We fund profitable traders with real money and split profit monthly. Prove to us that you know how to trade via any of our funding programs and get funded up to \$500,000.

You can trade overnight and over the weekend. You can trade without stop loss. EAs are allowed on live accounts but not on evaluation accounts.

Our Funding Models

1. Ten Express Evaluation
2. Instant Funding

TEN EXPRESS EVALUATION PROGRAM

Prove to us that you know how to trade via our evaluation program and get funded up to \$500,000.

Our evaluation program is a 1-step process where you show us your trading prowess, once you pass, you get funded instantly

Pass our 1-stage evaluation and start trading your live account

Account Size	\$3,000	\$10,000	\$30,000	\$90,000	\$270,000	\$500,000
Profit Target	10%	10%	10%	10%	10%	10%
Daily Drawdown	6%	6%	6%	3%	3%	3%
Overall Drawdown	9%(\$270)	8%(\$800)	7%(\$2100)	5%(\$4500)	5%(\$13500)	5%(\$25000)
Minimum Trading Days	5	5	5	5	10	10
Consistency Rule	Yes	Yes	Yes	Yes	Yes	Yes

Trading Period	Unlimited	Unlimited	Unlimited	Unlimited	Unlimited	Unlimited
Available Leverage	1:100	1:100	1:100	1:100	1:100	1:100
Registration fee	\$32	\$106	\$280	\$439	\$1096	\$1650

Our Evaluation Criteria

1. 10% Profit Target

To pass our one-phase evaluation, you only need to achieve a profit target of 10% without violating any of our rules. Whenever you pass the evaluation and get access to a live funded account, there is no more target.

2. Daily Drawdown

- Mini - 6%, Bronze - 6% and Silver - 6%
- Gold - 3%, Diamond - 3% and Silver - 3%

For Mini, Bronze and Silver accounts:

- If equity on a \$10,000 account is 10500 at rollover time today (server time 00:00), drawdown must not exceed 6% before the next rollover time (server time 00:00). This means equity must not go below \$9870 before the next rollover time (server time 00:00).

For Gold, Diamond and Master accounts:

- If equity on a \$90,000 account is \$95000 at rollover time today (server time 00:00), drawdown must not exceed 3% before the next rollover time (server time 00:00). This means equity must not go below \$92,150 before the next rollover time (server time 00:00).

Scenario:

You started trading with a \$10,000 evaluation account and made a closed or floating profit of \$900. Now your equity at rollover time 00:00 server time is \$10,900. You continued trading and had a floating loss of \$654 (6% daily drawdown). This is a hard violation of the daily drawdown rule, trader has failed the challenge, account is disabled and permanently lost.

Result: You fail the challenge, account is disabled and permanently lost

Note that once daily drawdown is triggered, it activates close all positions and equity/balance may increase or decrease before all the trades close out especially if the trader traded with large lot size.

3. Overall Drawdown

- Mini - 9%, Bronze - 8% and Silver - 7%
- Gold - 5%, Diamond - 5% and Silver - 5%
- The overall drawdown is calculated based on the initial balance of the account.

Example: If you have a \$3,000 Mini account, your equity must not go lower than \$2,730 (9% drawdown from the initial \$3,000 balance)

Example: If you have a \$90,000 Gold account, your equity must not fall below \$85,500 (5% drawdown from the initial \$90,000 balance)

If equity goes below the maximum drawdown threshold this is a hard violation of the overall drawdown rule, all trades are closed, account is disabled and is permanently lost.

Note that only daily drawdown and overall drawdown rule violations are triggered automatically and emails are sent in this regard.

TenTrade does not update/inform clients automatically via emails or calls when they breach other rules!

4. Profit Split

Profit Split is 70/30 on the live funded account

5. Payout

Bi-Weekly Payout: The standard payout for live accounts on the Funded Trader Program is set at a ratio of 70/30. This means that traders will receive 70% of the profits made within 15 calendar days if no rule is violated.

If a trader successfully achieves any % increase in their live trading account within 15 calendar days with a minimum of 5 active trading days, they will be eligible for a payout if no rule is violated.

Accelerated Payout: Once you are on your live funded account, there is an exciting opportunity to receive immediate compensation.

If a trader achieves a 10% increase in their trading account after 5 active minimum trading days. They will be eligible for an early payout, regardless of the monthly time frame if no rule is violated.

Account reviews are done only when pay-out requests are made by a funded trader! if funded trader has not violated any other rules pay-out is executed immediately

if funded trader has violated rules pay-out is denied and reset or disabled in line with the terms and conditions

6. Scaling Plan

Once you are on your live funded account, you have the option to withdraw profit or request to scale up your trading account to the next account size on our plan each time you make 10% profit.

You cannot withdraw and scale! Once a funded trader withdraws profit on an account such an account is no longer eligible for scaling. The maximum you can get scaled up to is \$500,000!

However, please note that the \$3,000 account is not **eligible** for scaling, but can only scale up with a \$10,000 account

For example, you grow our \$10,000 account to \$11,000, and you request for scaling, we will scale you directly into the \$30,000 live funded account.

7. Consistency Rule

The consistency rule is designed to ensure that traders on The Funded Trader program achieve steady and sustainable profits while effectively managing risk. being disciplined and following a trading plan.

The consistency rule has nothing to do with daily profits or profits per position but with lot size traded. The starting lot size which is the lot size of the first trade position on the evaluation account is the reference lot size.

It's important to avoid violating the consistency rules! If a funded trader makes profits as a result of inconsistent trades the funded trader forfeits all profits made on the account and gets another chance to start from the initial evaluation capital.

Trading inconsistent lot size on an evaluation account that is in overall loss as an excuse to request another chance is not acceptable

Using the starting lot as reference, traders can reduce lot size on subsequent trades by 50%(0.5x) of the starting lot size.

Using the starting lot as reference, trader can increase lot size on subsequent trades by 400%(4x) of the starting lot size

Indices lot size must be consistent with forex currencies lot size traded. TenTrade does not update/inform clients automatically via emails or calls when they breach consistency rules or any other rules except for daily drawdown and overall drawdown

Examples of Consistency Rule Applied to Evaluation account

1. Consider a \$10,000 evaluation account with a profit target of \$1,000 (10%) for evaluation. You have successfully hit your 10% profit target of \$1000.

The profit was made within 5 minimum trading days using the following positions

0.5

0.25

0.5

1.0

2.0

This trading pattern is consistent and adheres to the consistency rule

Result: Evaluation passed if no other rule is violated

2. Consider a \$10,000 evaluation account with a profit target of \$1,000 (10%) for evaluation. You have successfully hit your 10% profit target of \$1000 but the profit was made in 1 trading day using one position of 2.0 lot size.

You continue to trade with 0.01 to 0.99 lot size deliberately to cover the 5 minimum trading days!

The profit was made using the following positions

2.0

0.01

0.01

0.05

0.10

This trading pattern is inconsistent and violates the consistency rule

Result: All profit on the account will be forfeited and the funded trader gets another chance to start from the initial evaluation capital.

3. Consider a \$10,000 evaluation account with a profit target of \$1,000 (10%) for evaluation. You started trading with 0.01 lot size and adhered to the consistency rule on subsequent positions.

All of a sudden you increased the lot size to 2.0 and hit your 10% profit target of \$1000.

The profit was made using the following positions

0.01

0.01

0.01

2.0

0.01

This trading pattern is inconsistent and violates the consistency rule

Result: All profit on the account will be forfeited and the funded trader gets another chance to start from the initial evaluation capital.

8. Order Stacking and Inconsistency:

"Order stacking will be monitored and accounted for under the consistency Rule.

Traders are expected to maintain consistency when placing multiple, overlapping orders (stacking).

Any behavior deemed as order stacking that leads to inconsistent trading patterns or violates the firm's risk management policies will be flagged and subject to review, which may result in reset of the trading account.

Adherence to consistent trading practices is mandatory to maintain transparency and equity across all traders."

TenTrade retains the sole discretion to determine instances of inconsistent stacking and take appropriate actions, including but not limited to the termination of trading privileges and the forfeiture of payouts.

Examples of Consistency Rule Applied to Evaluation account

Unacceptable Stacking

Stack 1 : 0.2 lots x 10 (2 lots)

Stack 2 : 0.2 lots x 4 (0.8 lots)

Stack 3 : 0.2 lots x 4 (0.8 lots)

Stack 4 : 0.2 lots x 4 (0.8 lots)

Stack 5 : 0.2 lots x 4 (0.8 lots)

The above is a violation of the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stacked lot size range is (1lot) to (8lots) based on the consistency rule

Acceptable Stacking

Stack 1 : 0.2 lots x 10 (2lots)

Stack 2 : 0.2 lots x 5 (1lots)

Stack 3 : 0.2 lots x 8 (1.6lots)

Stack 4 : 0.2 lots x 40 (8 lots)

Stack 5 : 0.2 lots x 20 (4 lots)

The above obeys the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stack lot size range is (1lot) to (8lots) based on the consistency rule

Acceptable Stacking

Stack 1 : 0.2 lots x 10 (2lots)

Stack 2 : 0.1 lots x 10 (1lots)

Stack 3 : 0.4 lots x 4 (1.6lots)

Stack 4 : 0.8 lots x 10 (8 lots)

Stack 5 : 0.5 lots x 8 (4 lots)

The above obeys the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stack lot size range is (1lot) to (8lots) based on the consistency rule

Subsequent trading days also need to remain the same pattern of consistency as day one

Examples of Consistency Rule Applied to Evaluation account

Unacceptable Stacking

Stack 1 : 0.2 lots x 2 (0.4 lots)

Stack 2 : 0.2 lots x 10 (2.0 lots)

Stack 3 : 0.2 lots x 4 (0.8 lots)

Stack 4 : 0.2 lots x 8 (1.6 lots)

Stack 5 : 0.2 lots x 4 (0.8 lots)

The above is a violation of the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stacked lot size range is (0.2 lot) to (1.6 lots) based on the consistency rule

Acceptable Stacking

Stack 1 : 0.2 lots x 2 (0.4lots)

Stack 2 : 0.2 lots x 1 (0.2lots)

Stack 3 : 0.2 lots x 8 (1.6lots)

Stack 4 : 0.2 lots x 3 (0.6 lots)

Stack 5 : 0.2 lots x 6 (1.2 lots)

The above obeys the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stack lot size range is ((0.2 lot) to (1.6 lots) based on the consistency rule

Acceptable Stacking

Stack 1 : 0.2 lots x 2 (0.4lots)

Stack 2 : 0.1 lots x 2 (0.2lots)

Stack 3 : 0.4 lots x 2 (1.6lots)

Stack 4 : 0.3 lots x 2 (0.6 lots)

Stack 5 : 0.12 lots x 12 (1.2 lots)

The above obeys the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stack lot size range is ((0.2 lot) to (1.6 lots) based on the consistency rule

Subsequent trading days also need to remain the same pattern of consistency as day one

9. Expert Advisors, Latency Arbitrage, Manual Trading

The minimum holding time limit is 3 minutes for your trades in any of our programs; however, High-Frequency Trading (HFT) is strictly prohibited.

Latency Arbitrage is a high frequency trading strategy used to front-run trading orders. We do not accept latency arbitrage and we reserve our rights to cancel any trade under latency arbitrage.

10. Third party Copiers

Use of third party copiers is not allowed on evaluation and live funded accounts.

11. Refer and Earn Affiliate Commissions

Get 10% in commissions by referring friends who register and purchase a funded account through your unique link.

Multilevel Affiliate Commissions (premium partners only)

Terms and conditions apply: Multilevel commissions are activated when an affiliate achieves a premium partner status!

4% on Level 1 Sales:

Earn a 4% commission on all direct sales made by your direct referrals.

2% on Level 2 Sales:

Earn a 2% commission on all sales made by the referrals of your direct referrals.

To upgrade to premium partner contact support for details

Note: Premium partners caught cheating or abusing the privileges of the multilevel affiliate commissions program will be banned permanently from earning multi level commissions

Sign up, share your link, and earn rewards for each successful referral. Watch our video and Learn more [here](#)

12. The only ways you lose a live account?

1. If you violate the overall drawdown of starting balance
2. If you violate the daily drawdown from starting equity at rollover (00:00) server time
3. Hedging: We do not allow hedging
4. Violating ea and copy trading rules
5. Inactivity of 30 days. That is, if you do not place a trade within a 30 day period from the first trade.
6. Latency Arbitrage.
7. Using prohibited trading strategies

13. Prohibited trading strategies

- High-frequency trading
- Ultra-fast scalping
- Latency arbitrage trading
- Any tick scalping strategies
- Any reverse arbitrage trading
- Any hedge arbitrage trading
- Hedging between different accounts
- Holding trades for less than 3 minutes
- Inconsistent stacking

- gambling and overleveraging

It is important to emphasize that risking all on news trade to either hit withdrawal target or daily drawdown in one trade setup is a gambling strategy

If our risk team traces prohibited strategies, accounts involved will be lost with no refund of initial fee.

The aim of the TenTrade funded trader programme is to discover and support consistently profitable traders.

Trading with high margins is considered a gambling strategy and is against the program's aims and objectives!

Our risk desk team analyses funded trading styles and strategies to ensure compatibility with TenTrade's funded trader program beliefs of trading as well as the aims and objectives of TenTrade funded trader programme.

14. Cancellation of Trades, Account Reset, and Payout Denial

TenTrade reserves the right to cancel trades, reset accounts, and deny payouts where it is confirmed or suspected that a funded trader is using prohibited trading strategies.

Hedging abuse between normal accounts(standard,pro and ecn accounts) and funded accounts. This includes accounts owned by the funded trader or any other funded trader participating in the program.

Hedging refers to the practice of offsetting positions in one account by taking opposite positions in another account, thereby mitigating risk exposure. By accepting these terms and conditions, the funded trader acknowledges and agrees to comply with this policy.

TenTrade retains the sole discretion to determine instances of hedging and take appropriate actions, including but not limited to the termination of trading privileges and the forfeiture of payouts.

TenTrade reserves the right to cancel trades, reset accounts, and deny payouts where a funded trader violates funded trader program rules.

Rest assured TenTrade will never deny pay-outs for funded traders who have made profit legally according to the rules without cheating.

15. News Trading

Traders participating in the TenTrade Funded Trader Program are permitted to engage in

news trading without any restrictions. However, it is important to understand that market conditions during high-impact news events can be highly unpredictable, characterized by extreme volatility and unique liquidity behavior.

While TenTrade does not impose any limitations on trading during these periods, traders must acknowledge and accept that such market conditions may lead to slippage, delayed execution, partial fills, or orders not being filled at all. By participating in the TenTrade Funded Trader Program, you agree to accept any and all outcomes resulting from trading during high-impact news events, including, but not limited to, the aforementioned risks.

Furthermore, TenTrade support will not address or resolve any support issues or complaints arising specifically from trading during high-impact news events. Traders are encouraged to exercise caution and carefully consider the potential consequences of news trading before engaging in such activities

INSTANT FUNDING

Skip our evaluation program and get instant access to real funds. Start trading real money from day one. We compensate you by upgrading your trading capital to the next funding package each time you make a 10% profit.

INSTANT FUNDING RULES

1. No Profit Target

On our instant funding model, you are not under any pressure to hit a target within a timeframe. Trade at your pace and withdraw profit split of any profit you make

2. Daily Drawdown

- Mini - 6%, Bronze - 6% and Silver - 6%
- Gold - 3%, Diamond - 3% and Silver - 3%

Account Size	\$1,000	\$3,000	\$10,000	\$30,000	\$90,000	\$270,000	\$500,000
Monthly Profit Target	None	None	None	None	None	None	None
Accelerated Payout Target	10%	10%	10%	10%	10%	10%	10%

Standard Payout	15 days	15 days	15 days	15 days	15 days	15 days	15 days
Daily Drawdown	6%	6%	6%	6%	3%	3%	3%
Overall Drawdown	9%(\$90)	9%(\$270)	8%(\$800)	7%(\$2100)	5%(\$4500)	5%(\$13500)	5%(\$25000)
Minimum Trading Days	5	5	5	5	5	10	10
Consistency Rule	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Monthly Fees	None	None	None	None	None	None	None
Available Leverage	1:100	1:100	1:100	1:100	1:100	1:100	1:100
Profit Split	70/30						
Registration fee	\$43	\$110	\$330	\$990	\$2970	\$5500	\$11000

For Mini, Bronze and Silver accounts:

- If equity on a \$10,000 account is 10500 at rollover time today (server time 00:00), drawdown must not exceed 6% before the next rollover time (server time 00:00). This means equity must not go below \$9870 before the next rollover time (server time 00:00).

For Gold, Diamond and Master accounts:

- If equity on a \$90,000 account is \$95000 at rollover time today (server time 00:00), drawdown must not exceed 3% before the next rollover time (server time 00:00). This means equity must not go below \$92,150 before the next rollover time (server time 00:00).

Scenario:

You started trading with a \$10,000 evaluation account and made a closed or floating profit of \$900. Now your equity at rollover time 00:00 server time is \$10,900. You continued trading and had a floating loss of \$654 (6% daily drawdown).

This is a hard violation of the daily drawdown rule and the trader is ineligible for a payout while the account is disabled and permanently lost.

Note that once daily drawdown is triggered, it activates close all positions and equity/balance may increase or decrease before all the trades close out especially if the trader traded with large lot size.

3. Overall Drawdown

- Mini - 9%, Bronze - 8% and Silver - 7%
- Gold - 5%, Diamond - 5% and Silver - 5%

The overall drawdown is calculated based on the initial balance of the account.

Example: If you have a \$3,000 Mini account, your equity must not go lower than \$2,730 (9% drawdown from the initial \$3,000 balance).

Example: If you have a \$90,000 Gold account, your equity must not fall below \$85,500 (5% drawdown from the initial \$90,000 balance)

If equity goes below the maximum drawdown threshold this is a hard violation of the overall drawdown rule, all trades are closed, account is disabled and is permanently lost.

Note that once overall drawdown is triggered, it activates close all positions and equity/balance may increase or decrease before all the trades close out especially if the trader traded with large lot size.

Note that only daily drawdown and overall drawdown rule violations are triggered automatically and emails are sent in this regard.

TenTrade does not update/inform clients automatically via emails or calls when they breach other rules!

4. Profit Split

Profit Split is 70/30 on the live funded account

5. Payout

Bi-Weekly Payout: The standard payout for live accounts on the Funded Trader Program is set at a ratio of 70/30. This means that traders will receive 70% of the profits made within 15 calendar days if no rule is violated.

If a trader successfully achieves any % increase in their live trading account

within 15 calendar days with a minimum of 5 active trading days, they will be eligible for a payout if no rule is violated.

Accelerated Payout: Once you are on your live funded account, there is an exciting opportunity to receive immediate compensation.

If a trader achieves a 10% increase in their trading account after 5 active minimum trading days. They will be eligible for an early payout, regardless of the monthly time frame if no rule is violated.

Account reviews are done only when pay-out requests are made by a funded trader! if funded trader has not violated any other rules pay-out is executed immediately

if funded trader has violated rules pay-out is denied and reset or disabled in line with the terms and conditions

6. Scaling Plan

Once you are on your live funded account, you have the option to withdraw profit or request to scale up your trading account to the next account size on our plan each time you make 10% profit.

You cannot withdraw and scale! Once a funded trader withdraws profit on an account such an account is no longer eligible for scaling. Maximum you can get scaled up to is \$500,000!

However, please note that the \$3,000 account is not **eligible** for scaling, but can only scale up with a \$10,000 account

For example, you grow our \$10,000 account to \$11,000, and you request for scaling, we will scale you directly into the \$30,000 live funded account.

7. Consistency Rule

The consistency rule is designed to ensure that traders on The Funded Trader program achieve steady and sustainable profits while effectively managing risk. being disciplined and following a trading plan.

The consistency rule has nothing to do with daily profits or profits per position but with lot size traded. The starting lot size which is the lot size of the first trade position on the live account is the reference lot size.

It's important to avoid violating the consistency rules! If a funded trader makes profits as a result of inconsistent trades the funded trader forfeits all profits made on the account and gets another chance to start from the initial funded capital.

Trading inconsistent lot size on a funded account that is in overall loss as an excuse to request another chance is not acceptable! Account reset is at the discretion of the risk management team.

Using the starting lot as reference, traders can reduce lot size on subsequent trades by 50%(0.5x) of the starting lot size.

Using the starting lot as reference, trader can increase lot size on subsequent trades by 400%(4x) of the starting lot size

Indices lot size must be consistent with forex currencies lot size traded. TenTrade does not update/inform clients automatically via emails or calls when they breach consistency rules or any other rules except for daily drawdown and overall drawdown

Examples of Consistency Rule Applied to live accounts

1. Consider a \$10,000 live account and you successfully hit a 10% profit target of \$1000 to qualify for accelerated payout.

The profit was made within 5 minimum trading days using the following positions

0.5

0.25

0.5

1.0

2.0

This trading pattern is consistent and adheres to the consistency rule

Result: You are eligible for accelerated payout if no rule is violated

2. Consider a \$10,000 live account where you started trading with consistent lot size and adhered to the consistency rule on subsequent positions. You made a profit of \$500 within 15 calendar days with a minimum of 5 active trading days.

The profit was made using the following positions

0.5

0.25

0.5

1.0

2.0

This trading pattern is consistent and adheres to the consistency rule

Result: You are eligible for regular payout if no rule is violated

3. Consider a \$10,000 live account and you successfully hit a 10% profit target of \$1000 to qualify for accelerated payout, but the profit was made in 1 trading day using one position of 2.0 lot size.

You continue to trade with 0.01 to 0.99 lot size deliberately to cover the 5 minimum trading days!

The profit was made using the following positions

2.0

0.01

0.01

0.05

0.10

This trading pattern is inconsistent and violates the consistency rule

Result: You are not eligible for accelerated pay out, all profit on the account will be forfeited and the funded trader gets another chance to start from the initial

funded capital (reset).

4. Consider a \$10,000 live account where you started trading with 0.01 lot size and adhered to the consistency rule on subsequent positions.

All of a sudden you increased the lot size to 2.0 and hit your 10% profit target of \$1000.

The profit was made using the following positions

0.01

0.01

0.01

2.0

0.01

This trading pattern is inconsistent and violates the consistency rule

Result: You are not eligible for pay out and all profit on the account will be forfeited and the funded trader gets another chance to start from the initial funded capital.

5. Consider a \$10,000 live account where you made a profit of \$500 within 15 calendar days with a minimum of 5 active trading days.

The profit was made using the following positions

2.0

0.01

0.01

0.01

0.01

This trading pattern is inconsistent and violates the consistency rule

Result: You are not eligible for pay out and all profit on the account will be

forfeited and the funded trader gets another chance to start from the initial funded capital.

8. Order Stacking and Inconsistency:

"Order stacking will be monitored and accounted for under the consistency Rule.

Traders are expected to maintain consistency when placing multiple, overlapping orders (stacking).

Any behavior deemed as order stacking that leads to inconsistent trading patterns or violates the firm's risk management policies will be flagged and subject to review, which may result in reset of the trading account.

Adherence to consistent trading practices is mandatory to maintain transparency and equity across all traders."

TenTrade retains the sole discretion to determine instances of inconsistent stacking and take appropriate actions, including but not limited to the termination of trading privileges and the forfeiture of payouts.

Examples of Consistency Rule Applied to Instant account

Unacceptable Stacking

Stack 1 : 0.2 lots x 10 (2 lots)

Stack 2 : 0.2 lots x 4 (0.8 lots)

Stack 3 : 0.2 lots x 4 (0.8 lots)

Stack 4 : 0.2 lots x 4 (0.8 lots)

Stack 5 : 0.2 lots x 4 (0.8 lots)

The above is a violation of the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stacked lot size range is (1lot) to (8lots) based on the consistency rule

Acceptable Stacking

Stack 1 : 0.2 lots x 10 (2lots)

Stack 2 : 0.2 lots x 5 (1lots)

Stack 3 : 0.2 lots x 8 (1.6lots)

Stack 4 : 0.2 lots x 40 (8 lots)

Stack 5 : 0.2 lots x 20 (4 lots)

The above obeys the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stack lot size range is (1lot) to (8lots) based on the consistency rule

Acceptable Stacking

Stack 1 : 0.2 lots x 10 (2lots)

Stack 2 : 0.1 lots x 10 (1lots)

Stack 3 : 0.4 lots x 4 (1.6lots)

Stack 4 : 0.8 lots x 10 (8 lots)

Stack 5 : 0.5 lots x 8 (4 lots)

The above obeys the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stack lot size range is (1lot) to (8lots) based on the consistency rule

Subsequent trading days also need to remain the same pattern of consistency as day one

Examples of Consistency Rule Applied to Instant account

Unacceptable Stacking

Stack 1 : 0.2 lots x 2 (0.4 lots)

Stack 2 : 0.2 lots x 10 (2.0 lots)

Stack 3 : 0.2 lots x 4 (0.8 lots)

Stack 4 : 0.2 lots x 8 (1.6 lots)

Stack 5 : 0.2 lots x 4 (0.8 lots)

The above is a violation of the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stacked lot size range is (0.2 lot) to (1.6 lots) based on the consistency rule

Acceptable Stacking

Stack 1 : 0.2 lots x 2 (0.4lots)

Stack 2 : 0.2 lots x 1 (0.2lots)

Stack 3 : 0.2 lots x 8 (1.6lots)

Stack 4 : 0.2 lots x 3 (0.6 lots)

Stack 5 : 0.2 lots x 6 (1.2 lots)

The above obeys the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stack lot size range is ((0.2 lot) to (1.6 lots) based on the consistency rule

Acceptable Stacking

Stack 1 : 0.2 lots x 2(0.4lots)

Stack 2 : 0.1 lots x 2 (0.2lots)

Stack 3 : 0.4 lots x 2 (1.6lots)

Stack 4 : 0.3 lots x 2 (0.6 lots)

Stack 5 : 0.12 lots x 12 (1.2 lots)

The above obeys the consistency rule! The acceptable total stacked lot size range must obey the consistency rule, the acceptable total stack lot size range is ((0.2 lot) to (1.6 lots) based on the consistency rule

Subsequent trading days also need to remain the same pattern of consistency as day one

9. Expert Advisors and Latency Arbitrage

The minimum holding time limit is 3 minutes for your trades in any of our programs; however, High-Frequency Trading (HFT) is strictly prohibited.

Latency Arbitrage is a high frequency trading strategy used to front-run trading orders. We do not accept latency arbitrage and we reserve our rights to cancel any trade under latency arbitrage.

10. Third party Copiers

Use of third party copiers is not allowed on live funded accounts.

11. Refer and Earn Affiliate Commissions

Get 10% in commissions by referring friends who register and purchase a funded account through your unique link.

Multilevel Affiliate Commissions (premium partners only)

Terms and conditions apply: Multilevel commissions are activated when an affiliate achieves a premium partner status!

4% on Level 1 Sales:

Earn a 4% commission on all direct sales made by your direct referrals.

2% on Level 2 Sales:

To upgrade to premium partner contact support for details

Note: Premium partners caught cheating or abusing the privileges of the multilevel affiliate commissions program will be banned permanently from earning multi level commissions

Sign up, share your link, and earn rewards for each successful referral. Learn More [here](#)

12. The only ways you lose a live account?

8. If you violate the overall drawdown of starting balance
9. If you violate the daily drawdown from starting equity at rollover (00:00) server time
10. Hedging: We do not allow hedging
11. Violating ea and copy trading rules

12. Inactivity of 30 days. That is, if you do not place a trade within a 30 day period from the first trade.
13. Latency Arbitrage.
14. Using prohibited trading strategies

13. Prohibited trading strategies

- High-frequency trading
- Ultra-fast scalping
- Latency arbitrage trading

- Any tick scalping strategies
- Any reverse arbitrage trading
- Any hedge arbitrage trading
- Hedging between different accounts
- Holding trades for less than 3 minutes
- Inconsistent stacking
- gambling and overleveraging

It is important to emphasize that risking all on news trade to either hit withdrawal target or daily drawdown in one trade setup is a gambling strategy

If our risk team traces prohibited strategies, accounts involved will be lost with no refund of initial fee.

The aim of the TenTrade funded trader programme is to discover and support consistently profitable traders.

Trading with high margins is considered a gambling strategy and is against the program's aims and objectives!

Our risk desk team analyses funded trading styles and strategies to ensure compatibility with TenTrade's funded trader program beliefs of trading as well as the aims and objectives of TenTrade funded trader programme.

14. Cancellation of Trades, Account Reset, and Payout Denial

TenTrade reserves the right to cancel trades, reset accounts, and deny payouts where it is confirmed or suspected that a funded trader is using prohibited trading strategies.

Hedging abuse between normal accounts(standard,pro and ecn accounts) and funded accounts. This includes accounts owned by the funded trader or any other funded trader participating in the program.

Hedging refers to the practice of offsetting positions in one account by taking opposite positions in another account, thereby mitigating risk exposure. By accepting these terms and conditions, the funded trader acknowledges and agrees to comply with this policy.

TenTrade retains the sole discretion to determine instances of hedging and take appropriate actions, including but not limited to the termination of trading privileges and the forfeiture of payouts.

TenTrade reserves the right to cancel trades, reset accounts, and deny payouts where a funded trader violates funded trader program rules.

Rest assured TenTrade will never deny pay-outs for funded traders who have

made profit legally according to the rules without cheating.

15. News Trading

Traders participating in the TenTrade Funded Trader Program are permitted to engage in news trading without any restrictions. However, it is important to understand that market conditions during high-impact news events can be highly unpredictable, characterized by extreme volatility and unique liquidity behavior.

While TenTrade does not impose any limitations on trading during these periods, traders must acknowledge and accept that such market conditions may lead to slippage, delayed execution, partial fills, or orders not being filled at all. By participating in the TenTrade Funded Trader Program, you agree to accept any and all outcomes resulting from trading during high-impact news events, including, but not limited to, the aforementioned risks.

Furthermore, TenTrade support will not address or resolve any support issues or complaints arising specifically from trading during high-impact news events. Traders are encouraged to exercise caution and carefully consider the potential consequences of news trading before engaging in such activities
