Terms & Conditions**

2025

TEN TRADE FUNDED TRADER PROGRAM (TTFT)

TenTrade Funded Trader rules remain undisputedly the best in the industry right now seeing that it has the highest number of visible and verified payouts in the industry right now.

Our Funded Trader Program is the perfect way for you to benefit from trading with OUR money and enjoy the fruits of your success. All you have to do is put your trading skills, market knowledge, and bright strategies to work and profit from your successful trades with an account funded by us.

We are on a search for profitable traders. We fund profitable traders with real money and split profit monthly. Prove to us that you know how to trade via any of our funding programs and get funded up to \$500,000.

You can trade overnight and over the weekend. You can trade without stop loss. EAs are allowed on live accounts but not on evaluation accounts.

Our Funding Models:

- Ten Express Evaluation
- Instant Funding

TEN EXPRESS EVALUATION PROGRAM

Prove to us that you know how to trade via our evaluation program and get funded up to \$500,000.

Our evaluation program is a 1-step process where you show us your trading prowess, once you pass, you get funded instantly

Pass our 1-stage evaluation and start trading your live account

Account Size	\$3,000	\$10,000	\$30,000	\$90,000	\$270,000	\$500,000
Profit Target	10%	10%	10%	10%	10%	10%
Daily Drawdown	6%	6%	6%	3%	3%	3%
Overall Drawdown	9%(\$270)	8%(\$800)	7%(\$2100)	5%(\$4500)	5%(\$13500)	5%(\$25000)
Max Open Positions	5	5	5	5	5	5
Minimum Trading Days	5	5	5	5	10	10
Consistency Rule	No	No	No	No	No	No
Profit Score Maximum	25%	25%	25%	25%	25%	25%
Profit Target	10%	10%	10%	10%	10%	10%
Trading Period	Unlimited	Unlimited	Unlimited	Unlimited	Unlimited	Unlimited
Available Leverage	1:100	1:100	1:100	1:100	1:100	1:100
Registration fee	\$32	\$106	\$280	\$439	\$1096	\$1650

Our Evaluation Criteria

1. 10% Profit Target

To pass our one-phase evaluation, you only need to achieve a profit target of 10% without violating any of our rules. Whenever you pass the evaluation and get access to a live funded account, there is no more target.

2. Daily Drawdown

- Mini - 6%, Bronze - 6% and Silver - 6%
- Gold - 3%, Diamond - 3% and Silver - 3%

For Mini, Bronze and Silver accounts:

- If equity on a \$10,000 account is \$10,500 at rollover time today (server time 00:00 GMT+3), drawdown must not exceed 6% during this day 00:00 –23:59:59 GMT+3). This means equity must not go below \$9870 before the next rollover time (server time 23:59:59).

For Gold, Diamond and Master accounts:

- If equity on a \$90,000 account is \$95,000 at rollover time today (server time 00:00 GMT +3), drawdown must not exceed 3% during this day 00:00 –23:59:59 GMT+3).. This means equity must not go below \$92,150 before the next rollover time (server time 23:59:59).

Scenario:

You started trading with a \$10,000 evaluation account and made a closed or floating profit of \$900. Now your equity at rollover time 00:00 GMT+3 server time is \$10,900. You continued trading and had a floating loss of \$654 (6% daily drawdown). This is a hard violation of the daily drawdown rule, trader has failed the challenge, account is disabled and permanently lost.

Result: You fail the challenge; account is disabled and permanently lost

Note that once daily drawdown is triggered, it activates close all positions and equity/balance may increase or decrease before all the trades close out especially if the trader traded with large lot size and or during high impact events and volatile market conditions.

3. Overall Drawdown

- Mini - 9%, Bronze - 8% and Silver - 7%
- Gold - 5%, Diamond - 5% and Silver - 5%
- The overall drawdown is calculated based on the initial balance of the account.

Example: If you have a \$3,000 Mini account, your equity must not go lower than \$2,730 (9% drawdown from the initial \$3,000 balance)

Example: If you have a \$90,000 Gold account, your equity must not fall below \$85,500 (5% drawdown from the initial \$90,000 balance)

If equity goes below the maximum drawdown threshold this is a hard violation of the overall drawdown rule, all trades are closed, account is disabled and is permanently lost. Note that only daily drawdown rule violation is triggered automatically and emails are sent in this regard. TenTrade does not update/inform clients automatically via emails or calls when they breach other rules!

4. Profit Split

Profit Split per payout is 70/30 on the live funded account based on 10% maximum profit cap per pay out

5. Payout

Bi-Weekly Payout: The standard payout for live accounts on the Funded Trader Program is set at a ratio of 70/30. This means that traders will receive 70% of the profits made within 15 calendar days with at least 5 active trading days, if no rule is violated.

If a trader successfully achieves any % increase in their live trading account within 15 calendar days with a minimum of 5 active trading days, they will be eligible for a payout if no rule is violated.

Accelerated Payout: Once you are on your live funded account, there is an exciting opportunity to receive immediate compensation. If a trader achieves a 10% increase in their trading account after a minimum 5 active trading days. They will be eligible for an early payout, regardless of the monthly time frame if no rule is violated.

Account reviews are done only when pay-out requests are made by a funded trader! if funded trader has not violated any other rules, pay-out is executed immediately

6. Scaling Plan

Once you are on your live funded account, you have the option to withdraw profit or request to scale up your trading account to the next account size on our plan each time you make 10% profit.

You cannot withdraw and scale! Once a funded trader withdraws profit on an account such an account is no longer eligible for scaling. The maximum you can get scaled up to is \$500,000!

However, please note that the \$1,000 and \$3,000 accounts are not **eligible** for scaling, but can only scale up with a \$10,000 account and above.

For example, you grow our \$10,000 account to \$11,000, and you request for scaling, we will scale you directly into the \$30,000 live funded account.

7. Profit Score

7.1 What is the Profit Score

The Profit Score is a performance metric used to assess the consistency of a trader's results. It ensures that profits are generated through disciplined and repeatable strategies — not from one-off lucky trades or outsized wins.

7.2 How It Works

As a Funded Trader, you may generate unlimited profits. However, to demonstrate trading consistency, no single trade or trading day should account for more than 25% of your total closed profit at the time of payout request.

Example: If your total closed profit is \$1,000 your biggest winning trade or highest single-day profit should be \$250 or less.

7.3 Recommended Strategy

You are free to set your preferred profit target. For instance, on a \$10,000 account, the recommended profit target is \$1,000. Based on this, ensure that no single trade or day produces more than \$250 in profit (25%).

7.4 Tips to Stay Within the Profit Score Limit

To maintain a strong Profit Score and consistent trading profile, keep these practical pointers in mind:

Think long-term and steady: aim for repeatable results rather than one-off large winning days or trades

Balance your profits: avoid having any single trade or trading day represent more than 25 % of your total profits

Set a personal framework: a reasonable daily target can help preserve consistency. We recommend a 10% profit target, for example on a \$10,000 account target \$1,000 profit. This means your max daily profit should be \$250

Use Take Profit (TP) levels to automatically lock in gains and prevent breaching the Profit Score limit
Apply proper risk-to-reward ratios in your trading strategy

Focus on building consistent daily or weekly profits instead of aiming for large spikes

To help you stay within the Profit Score limits and maintain a consistent trading profile, here's a recommended strategy that many successful traders use:

Profit Score limit

Apply proper risk-to-reward ratios in your trading strategy

Focus on building consistent daily or weekly profits instead of aiming for large spikes

To help you stay within the Profit Score limits and maintain a consistent trading profile, here's a recommended strategy that many successful traders use:

7.5 Suggested Daily Profit Cap Based on Account Size

While you're free to set your own targets, you might find it helpful to keep your daily profits within the following ranges as a general guideline: This strategy will ensure that you are never denied a Live Account based on 25% profit score, see it as your cheat sheet to beating the Profit Score rule.

Account Size	Suggested Max Daily Profit
\$1,000	\$25
\$3,000	\$75
\$10,000	\$250
\$30,000	\$750
\$90,000	\$2250
\$270,000	\$6750
\$500,000	\$12500

Why it helps: Keeping your daily profit within these suggested limits can help you avoid concentration risk — where a single trade or day ends up representing too large a portion of your total profits. It's about building a steady, repeatable strategy that reflects discipline, not just performance.

Remember: The Suggested Daily Profit Cap Based on Account Size isn't a rule, just a helpful guide. Some days may go over the mark — and that's okay. Just aim to keep your overall profit distribution balanced over time.

7.6 Important Note on Payout Eligibility

If your Profit Score exceeds 25%: Do not request Live Account, as this will result in your account being reset to the starting balance. Instead, continue trading without requesting a Live Account. This allows you to increase your total profit and bring your Profit Score back within the acceptable range before requesting Live Account.

If the Profit Score rule is breached at time of payout request, the account will be reset to starting balance.

Case Study 1 : If at time of Live Account request total closed profit on the account from the day of account purchase to reference day is \$2,000 and the trading day with the highest closed profit is \$300. This implies a Profit score of 15%. The Trader is eligible to request Live Account provided other rules have not been breached.

Case Study 2 : If at time of Live Account request the total closed profit on the account from the day of account purchase up until the reference day is \$2,000 and the trading day with the highest closed profit is \$600. This implies a Profit score of 30%. The account will be reset to starting balance.

Case Study 3 : If at time of Live Account request total closed profit on the account from the day of account purchase to reference day is \$2,000 and the trade with the highest closed profit is \$300. This implies a Profit score of 15%. The Trader is eligible to request Live Account provided other rules have not been breached.

Case Study 4 : If at time of Live Account request the total closed profit on the account from the day of account purchase up until the reference day is \$2,000 and the trade with the highest closed profit is \$600. This implies a Profit score of 30%. The account will be reset to starting balance.

8. Maximum Open Positions

Traders can maintain a maximum of 5 open positions simultaneously across all account types and currency/asset pairs. This limit applies to all evaluation and instant funded accounts and ensures that no more than 5 open positions are active at any given time. This rule cannot be violated because the system is already programmed to allow a maximum of 5 open positions at a time.

9. Profit Cap Per Payout

The maximum payout for profit share on any live funded account per payout is 10%. If the live account size is \$10,000 and the trader makes 15% profit having satisfied all other rules, the payout received will be based on 10% of the initial capital of \$10,000 which is \$1,000. This implies that the 70/30 payout will be a \$700 payout to the funded trader. TenTrade Funded Traders can continue trading for more profit after payout is processed and account reset.

10. Expert Advisors, Latency Arbitrage and Double Leg Arbitrage

High-Frequency Trading (HFT), Latency Arbitrage and Double Leg Arbitrage is strictly prohibited.

Latency Arbitrage is a high frequency trading strategy used to front-run trading orders. We do not accept latency arbitrage. Accounts violating this rule will be deleted without any notice

Double leg latency arbitrage, or as it is also called, "hedge arbitrage" is a kind of arbitrage trade, where at the same time but at different brokers buy and sell positions of the same currency pair are opened and used to make profit on one broker and loss on the other broker. Accounts violating this rule will be deleted without any notice

11. Third party Copiers

Use of third party copiers is not allowed on evaluation and live funded accounts.

12. The only ways you lose an instant account:

- If you violate the overall drawdown of starting balance
- If you violate the daily drawdown from starting equity at rollover (00:00 GMT+3) server time.
- Violating copy trading rules
- Any inactivity of 30 days.
- Using prohibited trading strategies

13. Prohibited trading strategies

- High-frequency trading
- Ultra-fast scalping
- Latency arbitrage trading
- Double Leg Arbitrage
- Any tick scalping strategies
- Any reverse arbitrage trading
- Any hedge arbitrage trading
- Hedging between different accounts
- Gambling and overleveraging

It is important to emphasize that risking all on news trade to either hit payout target or daily drawdown in one trade setup is a gambling strategy

If our risk team traces prohibited strategies, accounts involved will be lost with no refund of initial fee. Accounts violating this rule will be deleted without any notice

The aim of the TenTrade funded trader program is to discover and support consistently profitable traders.

Trading with high margins is considered a gambling strategy and is against the program's aims and objectives!

Our risk desk team analyses funded trading styles and strategies to ensure compatibility with TenTrade's funded trader program beliefs of trading as well as the aims and objectives of TenTrade funded trader programme.

14. Cancellation of Trades, Account Reset, and Payout Denial

TenTrade reserves the right to cancel trades, ban traders, and deny payouts where it is confirmed or reasonably suspected that a funded trader is engaging in prohibited trading strategies.

This includes, but is not limited to, hedging abuse between normal accounts (Standard, Pro, Bonus and ECN accounts) and funded accounts—whether those accounts are owned by the funded trader or by any other participant in the funded trader program, or whether the hedging is done between Tentrade accounts or between other brokers' accounts. Hedging, in this context, refers to the practice of opening offsetting positions across accounts to manipulate risk or outcomes in a way that undermines the integrity of the program.

By accepting these terms and conditions, the funded trader expressly acknowledges and agrees that TenTrade retains the exclusive right, at its sole discretion, to determine what constitutes hedging or other prohibited strategies.

The trader further agrees that TenTrade may take any necessary action in response to such conduct, including but not limited to the cancellation of trades, resetting of accounts, banning of trader accounts, forfeiture or denial of payouts and deleting of accounts.

Furthermore, by agreeing to these terms, the trader accepts that any decision made by TenTrade in relation to violations of the program rules—including bans or denied payouts—is final and binding. This agreement forms a legally enforceable condition of participation in the funded trader program. For clarity, TenTrade affirms that it will not deny payouts to funded traders who generate profits lawfully and in full compliance with the program rules, without engaging in any form of manipulation or cheating.

15. News Trading Policy

Traders participating in the TenTrade Funded Trader Program are permitted to engage in news trading without any restrictions. However, it is essential to recognize that high-impact news events can create highly volatile market conditions, often accompanied by irregular liquidity and rapid price fluctuations, gap in prices and filling of pending orders in other prices other than the one pre-set by the trader. While TenTrade places no limitations on trading during such periods, traders must understand and accept the inherent risks involved. These may include, but are not limited to, slippage, delayed or partial order execution, or complete order rejection.

By participating in the program, you acknowledge and agree to bear full responsibility for any outcomes resulting from trades executed during high-impact news events.

Please note that TenTrade's support team will not investigate or respond to any claims or complaints related to trading activity during these periods. Traders are strongly encouraged to exercise discretion and thoroughly assess the potential risks before engaging in news trading.

16. Terms and Conditions Changes

TenTrade may amend the terms and conditions governing its Funded Trader Program at any time, without prior notice, as part of its ongoing efforts to improve the program and maintain operational integrity. All updates or changes will be shared via official communication channels—such as the website, email, or platform notifications. It is the responsibility of each participant to stay up to date with the current terms and policies, as continued participation constitutes acceptance of any revised conditions.

17. Social Media Defamation and Public Conduct

TenTrade clients and funded traders must not post misleading reviews, defamatory statements, or false information, nor engage in negative advertising about TenTrade or the TenTrade Funded Trader Program on social media or public platforms. Such actions may lead to account termination, a permanent ban, loss of access to TenTrade services without refund, and possible legal action.

18. Refer and Earn Affiliate Commissions

Get 10% in commissions by referring friends who register and purchase a funded account through your unique link.

Multilevel Affiliate Commissions (premium partners only)

Terms and conditions apply: Multilevel commissions are activated when an affiliate achieves a premium partner status!

4% on Level 1 Sales:

Earn a 4% commission on all direct sales made by your direct referrals. 2% on Level 2 Sales:

Earn a 2% commission on all sales made by the referrals of your direct referrals. To upgrade to premium partner contact support for details

Note: Premium partners caught cheating or abusing the privileges of the multilevel affiliate commissions program will be banned permanently from earning multi-level commissions

Sign up, share your link, and earn rewards for each successful referral.

INSTANT FUNDING

Skip our evaluation program and get instant access to real funds. Start trading real money from day one and withdraw profit after 5 minimum trading days.

INSTANT FUNDING RULES

Account Size	\$1,000	\$3,000	\$10,000	\$30,000	\$90,000	\$270,000	\$500,000
Profit Target	10%	10%	10%	10%	10%	10%	10%
Daily Drawdown	6%	6%	6%	6%	3%	3%	3%
Overall Drawdown	9%(\$90)	9%(\$270)	8%(\$800)	7%(\$2100)	5%(\$4500)	5%(\$13500)	5%(\$25000)
Max Open Positions	5	5	5	5	5	5	5
Minimum Trading Days	5	5	5	5	5	10	10
Consistency Rule	No	No	No	No	No	No	No
Profit Score Maximum	25%	25%	25%	25%	25%	25%	25%
Profit Cap Per payout	100	300	1,000	3,000	9,000	27,000	50,000
Trading Period	Unlimited	Unlimited	Unlimited	Unlimited	Unlimited	Unlimited	Unlimited
Available Leverage	1:100	1:100	1:100	1:100	1:100	1:100	1:100
Registration fee	\$43	\$110	\$330	\$990	\$2,400	\$5,500	\$11,000

1. No Profit Target

On our instant funding model, you are not under any pressure to hit a target within a timeframe. Trade at your pace and withdraw profit split of any profit you make

2. Daily Drawdown

- Mini - 6%, Bronze - 6% and Silver - 6%
- Gold - 3%, Diamond - 3% and Silver - 3%

For Mini, Bronze and Silver accounts:

- If equity on a \$10,000 account is \$10,500 at rollover time today (server time 00:00 GMT+3), drawdown must not exceed 6% during this day. This means equity must not go below \$9870 before the next rollover time (server time 23:59:59 GMT+3).

For Gold, Diamond and Master accounts:

- If equity on a \$90,000 account is \$95,000 at rollover time today (server time 00:00 GMT+3), drawdown must not exceed 3% during this day (server time 00:00 GMT+3). This means equity must not go below \$92,150 before the next rollover time (server time 00:00).

Scenario:

You started trading with a \$10,000 evaluation account and made a closed or floating profit of \$900. Now your equity at rollover time 00:00 GMT+3 server time is \$10,900. You continued trading and had a floating loss of \$654 (6% daily drawdown).

This is a hard violation of the daily drawdown rule, and the trader is ineligible for a payout while the account is disabled and permanently lost.

Note that once daily drawdown is triggered, it activates close all positions and equity/balance may increase or decrease before all the trades close out especially if the trader traded with large lot size or during high impact events or during high market volatility.

3. Overall Drawdown

- Mini - 9%, Bronze - 8% and Silver - 7%
- Gold - 5%, Diamond - 5% and Silver - 5%

The overall drawdown is calculated based on the initial balance of the account.

Example: If you have a \$3,000 Mini account, your equity must not go lower than \$2,730 (9% drawdown from the initial \$3,000 balance).

Example: If you have a \$90,000 Gold account, your equity must not fall below \$85,500 (5% drawdown from the initial \$90,000 balance)

If equity goes below the maximum drawdown threshold this is a hard violation of the overall drawdown rule, all trades are closed, account is disabled and is permanently lost.

Note that once overall drawdown is triggered, it activates close all positions and equity/balance may increase or decrease before all the trades close out especially if the trader traded with large lot size. Note that only daily drawdown and overall drawdown rule violations are triggered automatically and emails are sent in this regard.

TenTrade does not update/inform clients automatically via emails or calls when they breach other rules!

4. Profit Split

Profit Split per payout is 70/30 on the live funded account based on 10% maximum profit cap per pay out

5. Payout

Bi-Weekly Payout: The standard payout for live accounts on the Funded Trader Program is set at a ratio of 70/30. This means that traders will receive 70% of the profits made within 15 calendar days with at least 5 active trading days if no rule is violated.

If a trader successfully achieves any % increase in their live trading account within 15 calendar days with a minimum of 5 active trading days, they will be eligible for a payout if no rule is violated.

Accelerated Payout: Once you are on your live funded account, there is an exciting opportunity to receive immediate compensation.

If a trader achieves a 10% increase in their trading account after 5 active minimum trading days. They will be eligible for an early payout, regardless of the monthly time frame if no rule is violated. Account reviews are done only when pay-out requests are made by a funded trader! if funded trader has not violated any other rules pay-out is executed immediately

6. Scaling Plan

Once you are on your live funded account, you have the option to withdraw profit or request to scale up your trading account to the next account size on our plan each time you make 10% profit.

You cannot withdraw and scale! Once a funded trader withdraws profit on an account such an account is no longer eligible for scaling. The maximum you can get scaled up to is \$500,000!

However, please note that the \$3,000 account is not **eligible** for scaling, but can only scale up with a \$10,000 account

For example, you grow our \$10,000 account to \$11,000, and you request for scaling, we will scale you directly into the \$30,000 live funded account.

7. Profit score

7.1 What is the Profit Score

The Profit Score is a performance metric used to assess the consistency of a trader's results. It ensures that profits are generated through disciplined and repeatable strategies — not from one-off lucky trades or outsized wins.

7.2 How It Works

As a Funded Trader, you may generate unlimited profits. However, to demonstrate trading consistency, no single trade or trading day should account for more than 25% of your total closed profit at the time of payout request.

Example: If your total closed profit is \$1,000 your biggest winning trade or highest single-day profit should be \$250 or less.

7.3 Recommended Strategy

You are free to set your preferred profit target. For instance, on a \$10,000 account, the recommended profit target is \$1,000. Based on this, ensure that no single trade or day produces more than \$250 in profit (25%).

7.4 Tips to Stay Within the Profit Score Limit

To maintain a strong Profit Score and consistent trading profile, keep these practical pointers in mind:

Think long-term and steady: aim for repeatable results rather than one-off large winning days or trades

Balance your profits: avoid having any single trade or trading day represent more than 25 % of your total profits

Set a personal framework: a reasonable daily target can help preserve consistency. We recommend a 10% profit target, for example on a \$10,000 account target \$1,000 profit. This means your max daily profit should be \$250

Use Take Profit (TP) levels to automatically lock in gains and prevent breaching the Profit Score limit

Apply proper risk-to-reward ratios in your trading strategy

Focus on building consistent daily or weekly profits instead of aiming for large spikes

To help you stay within the Profit Score limits and maintain a consistent trading profile, here's a recommended strategy that many successful traders use:

7.5 Suggested Daily Profit Cap Based on Account Size

While you're free to set your own targets, you might find it helpful to keep your daily profits within the following ranges as a general guideline: This strategy will ensure that you are never denied payout based on 25% profit score, see it as your cheat sheet to beating the Profit Score rule.

Account Size	Suggested Max Daily Profit
\$1,000	\$25
\$3,000	\$75
\$10,000	\$250
\$30,000	\$750
\$90,000	\$2250
\$270,000	\$6750
\$500,000	\$12500

Why it helps: Keeping your daily profit within these suggested limits can help you avoid concentration risk — where a single trade or day ends up representing too large a portion of your total profits. It's about building a steady, repeatable strategy that reflects discipline, not just performance.

Remember: The Suggested Daily Profit Cap Based on Account Size isn't a rule, just a helpful guide. Some days may go over the mark — and that's okay. Just aim to keep your overall profit distribution balanced over time.

7.6 Important Note on Payout Eligibility

If your Profit Score exceeds 25%: Do not request payout, as this will result in your account being reset to the starting balance. Instead, continue trading without requesting a payout. This allows you to increase your total profit and bring your Profit Score back within the acceptable range before requesting Live payout.

If the Profit Score rule is breached at time of payout request, the account will be reset to starting balance.

Case Study 1 : If at time of payout request total closed profit on the account from the day of account purchase to reference day is \$2,000 and the trading day with the highest closed profit is \$300. This implies a Profit score of 15%. The Trader is eligible to request pay out provided other rules have not been breached.

Case Study 2 : If at time of payout request the total closed profit on the account from the day of account purchase up until the reference day is \$2,000 and the trading day with the highest closed profit is \$600. This implies a Profit score of 30%. The account will be reset to starting balance.

Case Study 3 : If at time of payout request total closed profit on the account from the day of account purchase to reference day is \$2,000 and the trade with the highest closed profit is \$300. This implies a Profit score of 15%. The Trader is eligible to request pay out provided other rules have not been breached.

Case Study 4 : If at time of payout request the total closed profit on the account from the day of account purchase up until the reference day is \$2,000 and the trade with the highest closed profit is \$600. This implies a Profit score of 30%. The account will be reset to starting balance.

8. Maximum Open Positions

Traders can maintain a maximum of 5 open positions simultaneously across all account types and currency/asset pairs. This limit applies to all evaluation and instant funded accounts and ensures that no more than 5 open positions are active at any given time. This rule cannot be violated because the system is already programmed to allow a maximum of 5 open positions at a time.

9. Profit Cap Per Payout

The maximum payout for profit share on any live funded account per payout is 10%. If the live account size is \$10,000 and the trader makes 15% profit having satisfied all other rules, the payout received will be based on 10% of the initial capital of \$10,000 which is \$1,000. This implies that the 70/30 payout will be a \$700 payout to the funded trader. TenTrade Funded Traders can continue trading for more profit after payout is processed and account reset.

10. Expert Advisors, Latency Arbitrage and Double Leg Arbitrage

High-Frequency Trading (HFT), Latency Arbitrage and Double Leg Arbitrage is strictly prohibited.

Latency Arbitrage is a high frequency trading strategy used to front-run trading orders. We do not accept latency arbitrage and we reserve our rights to cancel any trade under latency arbitrage.

Double leg latency arbitrage, or as it is also called, "hedge arbitrage" is a kind of arbitrage trade, where at the same time but at different brokers buy and sell positions of the same currency pair are opened and used to make profit on one broker and loss on the other broker. Accounts violating this rule will be deleted without any notice

11. Third party Copiers

Use of third party copiers is not allowed on evaluation and live funded accounts.

12. The only ways you lose an evaluation account?

- If you violate the overall drawdown of starting balance
- If you violate the daily drawdown from starting equity at rollover (00:00) server time.
- Violating copy trading rules
- Any inactivity of 30 days after your first trade
- Using prohibited trading strategies

13. Prohibited trading strategies

- High-frequency trading
- Ultra-fast scalping
- Latency arbitrage trading
- Double Leg Arbitrage
- Any tick scalping strategies
- Any reverse arbitrage trading
- Any hedge arbitrage trading
- Hedging between different accounts
- Gambling and overleveraging

It is important to emphasize that risking all on news trade to either hit payout target or daily drawdown in one trade setup is a gambling strategy

If our risk team traces prohibited strategies, accounts involved will be lost with no refund of initial fee. Accounts violating this rule will be deleted without any notice

The aim of the TenTrade funded trader programme is to discover and support consistently profitable traders.

Trading with high margins is considered a gambling strategy and is against the program's aims and objectives!

Our risk desk team analyses funded trading styles and strategies to ensure compatibility with TenTrade's funded trader program beliefs of trading as well as the aims and objectives of TenTrade funded trader programme.

14. Cancellation of Trades, Account Reset, and Payout Denial

TenTrade reserves the right to cancel trades, ban traders, and deny payouts where it is confirmed or reasonably suspected that a funded trader is engaging in prohibited trading strategies.

This includes, but is not limited to, hedging abuse between normal accounts (Standard, Pro, and ECN accounts) and funded accounts—whether those accounts are owned by the funded trader or by any other participant in the funded trader program or whether they are between Tentrade and another broker. Hedging, in this context, refers to the practice of opening offsetting positions across accounts to manipulate risk or outcomes in a way that undermines the integrity of the program.

By accepting these terms and conditions, the funded trader expressly acknowledges and agrees that TenTrade retains the exclusive right, at its sole discretion, to determine what constitutes hedging or other prohibited strategies.

The trader further agrees that TenTrade may take any necessary action in response to such conduct, including but not limited to the cancellation of trades, resetting of accounts, banning of trader accounts, forfeiture or denial of payouts and deleting of accounts.

Furthermore, by agreeing to these terms, the trader accepts that any decision made by TenTrade in relation to violations of the program rules—including bans or denied payouts—is final and binding. This agreement forms a legally enforceable condition of participation in the funded trader program. For clarity, TenTrade affirms that it will not deny payouts to funded traders who generate profits lawfully and in full compliance with the program rules, without engaging in any form of manipulation or cheating.

15. News Trading Policy

Traders participating in the TenTrade Funded Trader Program are permitted to engage in news trading without any restrictions. However, it is essential to recognize that high-impact news events can create highly volatile market conditions, often accompanied by irregular liquidity and rapid price fluctuations, gap in prices and filling of pending orders in other prices other than the one pre-set by the trader. While TenTrade places no limitations on trading during such periods, traders must understand and accept the inherent risks involved. These may include, but are not limited to, slippage, delayed or partial order execution, or complete order rejection.

By participating in the program, you acknowledge and agree to bear full responsibility for any outcomes resulting from trades executed during high-impact news events.

Please note that TenTrade's support team will not investigate or respond to any claims or complaints related to trading activity during these periods. Traders are strongly encouraged to exercise discretion and thoroughly assess the potential risks before engaging in news trading.

16. Terms and Conditions Changes

TenTrade may amend the terms and conditions governing its Funded Trader Program at any time, without prior notice, as part of its ongoing efforts to improve the program and maintain operational integrity. All updates or changes will be shared via official communication channels—such as the website, email, or platform notifications. It is the responsibility of each participant to stay up to date with the current terms and policies, as continued participation constitutes acceptance of any revised conditions.

17. Social Media Defamation and Public Conduct

TenTrade clients and funded traders must not post misleading reviews, defamatory statements, or false information, nor engage in negative advertising about TenTrade or the TenTrade Funded Trader Program on social media or public platforms. Such actions may lead to account termination, a permanent ban, loss of access to TenTrade services without refund, and possible legal action.

18. Refer and Earn Affiliate Commissions

Get 10% in commissions by referring friends who register and purchase a funded account through your unique link.

Continue

Once you click on the button, this page will open, fill in your information and you'll immediately be taken to the TenTrade client portal. Also, you will receive an email from TenTrade containing your login details for next time you'd want to login to the client portal. Please check your inbox or spam folder

STEP 2 : MAKE A DEPOSIT

On the left side of your client portal, Select “**Funds**” then click on **Deposit Funds** to make a deposit of the amount of funding package that interests you. There are different deposit methods such as cryptocurrency, bank transfer, perfect money, neteller, skrill etc

The screenshot displays the TenTrade client portal interface. On the left, the 'TRADER'S MENU' sidebar is visible, with 'Funds' selected and 'Deposit Funds' highlighted by a red arrow. The main content area shows the 'Deposit Funds' page, which includes a progress bar with three steps: '1. INITIAL INFORMATION', '2. TRANSFER DETAILS', and '3. CONFIRMATION'. The form contains two dropdown menus: 'Deposit To' (set to 'My Wallet 4553 (0.00 USD)') and 'Deposit From' (set to 'Select'). A green 'Continue' button is located at the bottom of the form. The top navigation bar features three buttons: 'Open Demo Account', 'Open Live Account', and 'Deposit Funds' (highlighted with a red box). The footer includes a disclaimer: 'Trading Forex Instruments and CFDs can incur a high level of risk and may result in a loss of all your invested capital' and a small text 'Powered by F10Trade (R) 2021/10/01'.

STEP 3 : CHOOSE A PACKAGE

Once you've made your deposit, on the left side of your client portal, under the **Funded Trader**, click on **Apply Now**. Select the trading model you prefer then the package you want, after that click on **Continue** button at the bottom to subscribe

Once you have made the subscription, your request will show as pending and within a few minutes, your trading account details for the trading model will be sent to you via email
